REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The closest prior art is Kenyon (US 3010583) in which a fuel tester filter 32 with a support 34 is illustrated within a housing 10 made up of two elements 50 and 52. The device is designed to remove particulate materials for later analysis of the particulate materials as the test sample is introduced into the receptacle 16. Applicant's filter is made to filter material as it is being removed from the tester thus retaining water in the tester as the sample is returned to tank. Kenyon '583 fails to disclose a protective cap for the end of the filter device attached to the container 16. Further, the filter is only for filtering particulate matter and does not discuss its water retention properties. Various caps are known in the art of fluid transferring such as Diekman (US 4956298) see element 42 or 60. Diekman '298 is not readily combinable with Kenyon '583 and the combination would still fall short of the scope of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
